SUMMARY

Web developer with a Postgraduate Diploma in Web Development from Conestoga College and a Bachelor's degree in Information Technology. I build fast, interactive web applications with TypeScript and JavaScript, and back-end services with Java, Spring Boot and Node.js, from a real-time 3D solar system explorer to a fault-tolerant distributed key-value store. Strong eye for UI/UX and accessibility, and I care about clean, well-tested code.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, Java, Python, SQL, HTML5, CSS3
Front End	React, Three.js, Canvas and SVG graphics, Web Audio API, responsive and accessible design, Vite
Back End	Node.js, Spring Boot, Spring Data JPA, RESTful APIs, relational databases (H2, SQL)
Tools & Practices	Git, GitHub, GitHub Actions (CI/CD), GitHub Pages, JUnit 5, Agile, VS Code

PROJECTS

Wave Studio – Browser Music Studio | *TypeScript, Vite, Web Audio API* hanee2907.github.io/wave-studio

- Built real-time pitch detection (autocorrelation) that turns a sung melody into notes, plus onset detection that generates a drum beat or tabla theka from the singer's rhythm.
- Synthesized every instrument in code (tabla, sitar via the Karplus-Strong algorithm, tanpura, drums); added a look-ahead audio scheduler, WAV export and song sharing through compact URL encoding. Supports Western scales and 15 Indian ragas.

raft-kv – Distributed Key-Value Store | *Java 21* github.com/Hanee2907/raft-kv

- Implemented the Raft consensus algorithm from scratch with no dependencies: leader election, log replication with fast conflict backtracking, snapshots and log compaction.
- Built a Jepsen-style test harness that injects network partitions and node crashes and verifies the system stays linearizable.

ORBITAL – 3D Solar System & Exoplanet Explorer | *TypeScript, Three.js, Vite* Live demo

- Interactive 3D scene with planet positions computed for today's date, smooth camera fly-throughs, free-flight mode, side-by-side planet comparison and saved missions.

Production Incident Investigator | *Java 21, Spring Boot 3, Spring Data JPA, JUnit 5* GitHub

- Ingests application logs, groups similar errors with normalized SHA-256 fingerprints, and automatically opens, escalates and tracks incidents; REST API and dashboard tested with JUnit 5 and MockMvc.

More Web Apps | *HTML, CSS, JavaScript, Canvas, SVG* github.com/Hanee2907

- **Starlog** (mood journal drawn as an animated star map), **Habit Garden** (habit tracker with streak and season logic) and **SkyCast** (live weather dashboard using the Open-Meteo API), all deployed on GitHub Pages.

EXPERIENCE

Junior Web Developer (Intern) | *Ethos Tech Solutions, Surat, India* 07/2022 – 12/2022

- Built and maintained responsive websites, improving performance and user experience across devices.
- Contributed features to client web applications, focusing on efficient, readable and usable code.
- Worked closely with the development team to deliver tasks on schedule throughout the 5-month internship.

EDUCATION

Postgraduate Diploma, Web Development | *Conestoga College, Kitchener, ON* 05/2023 – 08/2024

Responsive and accessible front-end development, Node.js and RESTful APIs, Git, Agile project delivery

Bachelor's Degree, Information Technology | *SVIT, Vasad, India* 07/2018 – 05/2022

Data structures and algorithms, database design and SQL, computer networks, operating systems

CERTIFICATION & INTERESTS

Certification	Programming for Everybody (Getting Started with Python)
Interests	Singing (Indian music), badminton, cricket, volleyball, chess, carrom
